UNDENIABLY DIFFERENT

CarbonWorks Technology

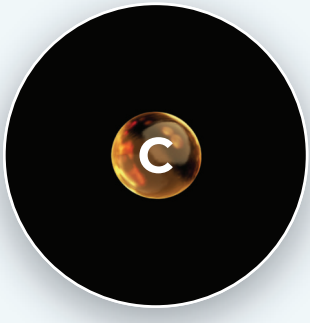
We love when the competition shows up to tailgate trials. Because in just 60 seconds, it's clear that CarbonWorks' technology is undeniably different.

2.0 ULTRA-LOW PH

OXYGEN ENRICHED

INFUSED HYDROGEN ENERGY

COMPETITION



Composition: **Carbon**

pH: **Above 7.0**

Molecular Oxygen: **Negative (Below 0)**

CARBONWORKS

Composition: **Carbon, Hydrogen, Oxygen**

pH: **1.5 – 2.5**

Molecular Oxygen: **+250 to +300**

OUR PRODUCTS

Unprocessed humic granules and powders are ineffective. We extract pure carbon from the raw materials and activate it with food-grade potassium hydroxide. We don't stop here.

Through a process unique to CarbonWorks, we attach high amounts of molecular oxygen and hydrogen to carbon molecules in a low-pH solution. It is this combination of nutrients that helps CarbonWorks' products deliver unsurpassed results.
